

Elevator Engineers

PIONEERS OF ELEVATOR ENGINEERING

WE DEAL IN ALL TYPES OF ELEVATORS AND ESCALATORS

MODERNIZATION

JM Group also provided Elevator modernization to upgrade old Spear parts with new and durable products, Modernization is mainly to reduce repair expenses of Clients. It includes Cab Remodeling, Fixture Replacement, Control Upgrades, State of Illinois, Compliance, Door Operator Replacement, Power Unit Upgrade, Safety, and Efficiency upgrades.

INSTALLATION

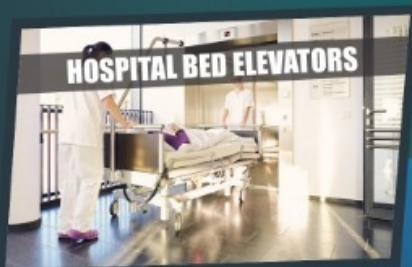

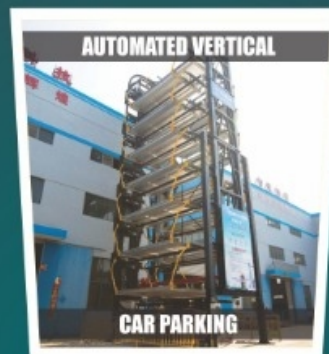

Our skilled team professionalizes in installing elevators, in order to install floor to floor elevator you will need to make a shaft through which it can travel vertically. The second important thing is to set wiring and all the electrical components so that it can function properly.

MANUFACTURING

Few important things should be kept in mind while manufacturing elevators, first the design which entirely depends on the elevator type. The second thing is the Raw materials we use, then comes the manufacturing process the most important part.

MAINTENANCE

JM Elevator will charge for only those parts which will need repairing. Many other companies add a disclaimer to their guarantees but we want our clients to be fully satisfied with the work we do.
